

SELECT PERSONS MEETING

April 17, 2008

Present: Stan Judge, Heidi Behling, Lucy Evans (later), Ken Simonoko, Richard Mishio - Time Warner, Jo Carpenter

Site Walk on setting a pole - east end of North Road

After meeting at the Town Hall, everyone (Lucy arrived later after her appointment) traveled to the site of the pole request.

Time Warner has requested to set one pole and run an overhead line so they will not have to dig under the oil pipeline. Mr. Mishio explained that the equipment they use sometimes will travel upwards during a drilling. He said if this happens then the oil line could be punctured and this would cause a leak. He said he would really like to avoid digging under the oil line. He showed Ken and the Board where the pole would be set and where the line will run. He said that he can run the line 18 - 21 ft above the road so the view will not be impacted. He demonstrated where a height of 21 ft. would run.

The Board felt comfortable with this option and gave permission to set 1 pole. Mr. Mishio will send the Board a letter about the position of the pole and the height of the line.

Stan also talked to Mr. Mishio about service for the rest of the town. Mr. Mishio said that there are provisions for a node near the intersection of Route 2 and the west end of North Road. Stan said that the Board would really like that node to be installed. Mr. Mishio said he will bring that information back.

Heidi had to leave but Stan and Lucy came back to the Town Hall to sign vouchers, an excavation warrant and an Excavation Intent.

The meeting adjourned at 4:30 PM.
